

The SIMS Teacher app

Making everyday classroom tasks even easier

SIMS Teacher app installation and setup service

NEW

To help get started with the SIMS Teacher app SIMS offer an optional installation and setup service.

The Teacher app has been designed to allow a school's SIMS IT support to setup the Teacher app, but where a school wishes to get started with the app with help from SIMS directly, we can provide two options to choose from:

Option 1: Remote Teacher app installation - £99

This service provides a remote installation and technical setup of the Teacher app service for the school by a SIMS engineer. Once the Teacher app service has been setup, the engineer will provide the school with copies of the Teacher app school administrator guide and the Teacher app getting started guide for teachers.

Option 2: Remote Teacher app installation and Teacher app overview session - £199

This service provides a remote installation and technical setup of the Teacher app service for the school by a SIMS engineer, plus a 30 minute remote overview of the Teacher app management console, including creating two device codes plus an overview of the Teacher app key features.

The engineer will also provide the school with copies of the school administrator guide and the Teacher app Getting Started guide for teachers.
